# The Story of Perfection. Our Story.

Because of our Japanese roots, aiming for the highest quality is in our DNA. We pursue this both at product level and in customer support. Our urge for perfection is embedded into Japanese culture, where perfection is symbolized by a circle. This so-called Ensō has been represented in Japan since living memory as an expression of perfection. Because the Ensō is an important and meaningful symbol with which Kovax strongly identifies, the circle is a recurring element in our design. Also, in Japanese Kanji script, Ensō literally means 'circle of togetherness'. Meaning maintaining harmonious collaborations with relations.

This vision is fully in line with the philosophy of Kovax. We create perfection in our ultra-modern factories, where we combine the latest (production) technologies with our 90 years of experience in developing and producing sanding solutions. The result is a complete sanding line that enables

dry sanding until the finest grit. Thanks to the highly uniform end result, you can truly differentiate yourself and, at the same time, significantly reduce your labor time. But we go even further! Our need for perfection also means that we think ahead: How can we make tomorrow's work even easier and more efficient for you? Or, what sanding solution can we offer you for new application fields, materials, etc.? We therefore regularly introduce innovative products that are completely new world-wide.

But above all, we strive for perfection by creating harmonious relationships with our customers. Personal contact, loyalty and short lines of communication. Connecting with each other.

That is the strength of Kovax. That is our Story of Perfection!

## The Kovax Family

One of the basic principles of Japanese culture is loyalty. This was already practiced by the Japanese samurai warriors. Kovax is also a strong supporter: in all our relations we aim for long-term cooperation based on mutual respect and trust.

Meanwhile, our partner network consists of partners from 45 countries. Together we cooperate, share knowledge and our partners mutually respect each other's markets. As a result, we create new business opportunities, increase each other's success and realise continuity. A stable future, especially in changing market conditions.

Together we are strong and can meet any challenge. We are the Kovax family!

## TOP PRODUCTS

## MAXCUT

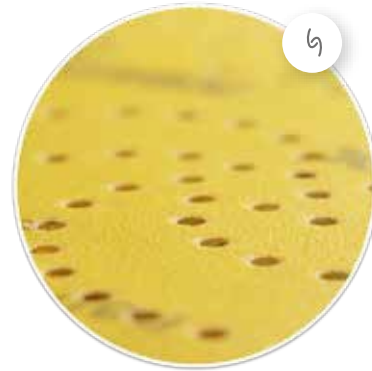

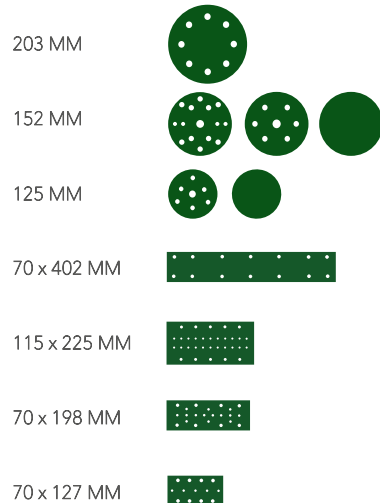

### P60 - P180

*THE NUMBER 1 SOLUTION WHEN  
SANDING HARD PUTTY AND METAL.*

#### ADVANTAGES MAXCUT

The Maxcut products have specially hardened Aluminium Oxide grains, which score a 9.8 on Mohs scale of mineral hardness. Compared to the hardest mineral, which is industrially produced diamond with a score of 10, this is nearly the hardest existing mineral and thus perfectly suited for extremely hard sanding work. Thanks to its open structure clogging will be prevented.

## MAXFILM

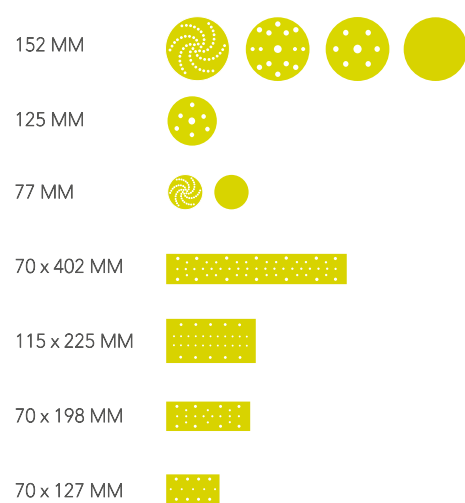

### P60 - P600

*MAXFILM STANDS FOR MAXIMUM  
DURABILITY FOR ALL YOUR  
SANDING WORK, FROM SANDING  
BARE METAL TO SANDING PRIMER.*

#### ADVANTAGES MAXFILM

The film backing of Maxfilm allows a more direct contact with the sanding surface and prevents the grains to drop into the backing. In combination with its double anti-clogging coating this results in a significantly longer lifetime. The printed P-value on top of the disc ensures maximum ease of use.

## SUPER ASSILEX

### K240 - K1500

*THE UNIQUE WAY OF DRY SANDING, UNIFORMITY AND FLEXIBILITY THAT AMAZE.*

#### ADVANTAGES SUPER ASSILEX

The innovative latex backing and the unique grain structure result in extremely uniform and shallow scratches. The products of Super Assilex are supporting you during your daily sanding jobs due to Super Assilex' outstanding cutting performance and speed. This results in more efficiency. Super Assilex prevents potential problems in the rest of the sanding process.

## MAGIC DISC

### 320 - 500

*SPECIALLY DEVELOPED SANDING DISC FOR E-COAT AND VERY HARD, MATT CLEAR COAT SANDING.*

#### ADVANTAGES MAGIC DISC

The Magic Disc with its film backing, the new developed diamond grain and the new generation 2.0 anti-clogging coating, has an unbelievable long lifetime on hard coatings. High aggressiveness comes together with very uniform scratches.

PRODUCTS.

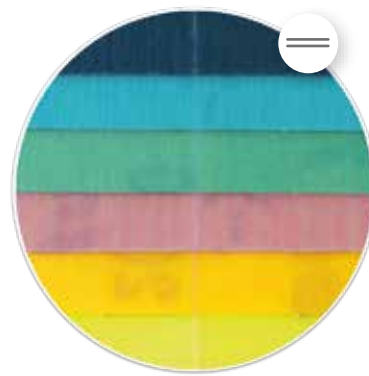

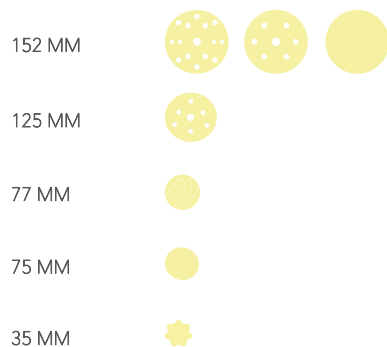

## YELLOW FILM P800 - P2000

*THE NUMBER 1 SOLUTION FOR BLENDING ZONES, WITH A GUARANTEED PERFECTLY, NON-VISIBLE TRANSITION FROM OLD TO NEW CLEAR COAT.*

### ADVANTAGES YELLOW FILM

The film backing in combination with an anti-burning coating allows a cool sanding process. Consequently, burning spots can be brought to a minimum and the risk of deep scratches is reduced significantly. Yellow Film is ideal for top coat sanding, removal of imperfections and removal of orange peel structure. The main markets of Yellow Film are the automotive sector and the wood industry.

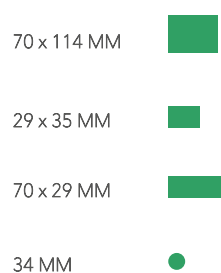

## TOLECUT K800 - K3000

*THE WORLD CHAMPION WHEN IT COMES TO DRY IMPERFECTION REMOVAL.*

### ADVANTAGES TOLECUT

Tolecut is a dry sanding system. Without the use of water it is always possible to see how far the imperfection has been removed. Because of the constant visible result, the risk to sand through the topcoat is reduced to a minimum. Tolecut is unique in its cutting power and due to its flexibility it is also suitable for concave and convex areas. The ease of use makes it a must have for every dent professional.

## BUFLEX DRY

### K2000 - K3000

*THE FINEST ABRASIVE FOR  
MAXIMUM POLISH TIME  
REDUCTION.*

#### ADVANTAGES BUFLEX DRY

The ultra flexible, innovative latex backing with a unique grain structure ensures extremely uniform scratches. The especially developed female-female velcro ensures process safety and prevents scratches caused by hard velcro. Buflex Dry retains the coating structure.

INTERFACE PAD

DISCOVER OUR  
INTERFACE PADS - JUST  
SCAN AND WATCH!

# Your choice. Your process. Your environment.

Unlike foam backed abrasives, interface pads have an extremely long lifespan. So you don't have to constantly replace them. This not only saves you time and materials, but it also reduces waste and helps protect the planet. Did you know that 1 interface pad equals 500 foam backed abrasives?

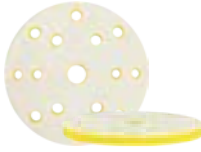

In addition, interface pads offer multiple options in your sanding process. For example, you can choose a hard pad for more aggressiveness or a soft pad for more uniformity or to sand curves. This way you can personalize your sanding process!
