Magic Disc

320 - 500

The Magic Disc is specially developed for sanding **E-coat & hard, matte clear coats**. Thanks to the film backing, the synthetic diamond grain and the anti-clogging coating 2.0, the Magic Disc achieves an unrivalled **durability** on extremely hard surfaces. With the Magic Disc you prepare spare parts in a **short time** for further painting steps, thanks to the high aggressiveness and the uniform scratches. Use grits 320 & 400 to prepare E-coat surfaces and use grit 500 to prepare matte and scratch resistant clear coats.

Grit	152 MM - 15H	*Application
320	528-0320	
400	528-0400	
500	528-0500	

*See other side for meaning application icon.

FOR EASIER USE ON CONVEX AND CONCAVE SURFACES, USE IN COMBINATION WITH THE HARD SUPER ASSILEX INTERFACE PAD **971-0057**.
