## P80 - P600

### MAXFILM P80 - P600

Metal Sanding, Removing  
Old Layers, Putty Sanding,  
Primer Sanding

### SUPER ASSILEX

K240 - K1500  
Putty Sanding,  
Primer Sanding,  
Blending, Finishing

### TOLECUT

K800 - K3000  
Imperfection  
Removal

Use Maxfilm for your complete preparation process, from putty to primer sanding. Maxfilm is available in discs (P80-P600) and multi-hole sheets (P80-P400). After finishing with Maxfilm multihole sheets, we recommend to continue with Maxfilm discs to smoothen the surface and prepare for the next step. For a perfect primer finish, we advice to continue with Super Assilex K500/K600/K800 after finishing with Maxfilm discs. With minimum effort, last sanding marks are removed and a perfect base for the painting process is created. Additionally we recommend using Super Assilex K800 - K1500 for the blending process of old paint layers.
